

Queen's University Belfast, 5 & 6 September 2014

Friday, 5 September	
11:00—12:00	Registration
12:00	Opening by Prof James McElnay, Pro-VC of Queen's University
12:10—13:00	Gilles Godefroy <i>The Lipschitz-free Banach Spaces Associated with a Metric Space</i>
13:00—14:00	Lunch
14:00—14:50	Raúl Curto <i>Truncated Moment Problems: The Interplay Between Functional Analysis, Algebraic Geometry and Optimization</i>
15:00—15:30	Tony Wickstead <i>Two Dimensional Unital Riesz Algebras</i>
15:30—16:00	Coffee/Tea
16:00—16:30	Claus Koestler <i>Thompson Group F from the Viewpoint of Noncommutative Probability</i>
16:30—17:00	Stephen Gardiner <i>Universal Taylor Series</i>
17:00—17:50	Frank Lutz <i>On the Topology of Steel</i>
19:30	Conference Dinner in the Great Hall

Saturday, 6 September	
8:30—10:00	IMS Committee Meeting (David Bates Building 0G/007)
10:00—10:30	James O'Shea <i>Multiples of Pfister Forms</i>
10:30—11:20	Brigitte Lutz-Westphal <i>Bringing Authenticity to the Mathematics Classroom</i>
11:30—12:00	Coffee/Tea
12:00—12:50	Gary McGuire <i>Online Security in Bits: Recent Developments in Public Key Cryptography</i>
13:00—14:30	AGM (Sandwich Lunch provided)
14:30—15:20	Götz Pfeiffer <i>Computing with Groups and Algebras</i>
15:30—16:00	Steve Buckley <i>Groups that are Isoclinic to Rings</i>
16:00—16:30	Coffee/Tea
16:30—17:20	Alain Valette <i>The Kadison—Singer Problem</i>
17:30	Closing of the Meeting
